**Easy-Link Retaining Walls**

EASY-LINK is a new Retaining Wall System. It is fast becoming the first choice for professional Builders, Landscapers, Architects and the "do it yourself" home handy man. The many features and benefits make EASY-LINK Retaining Walls a truly professional product. EASY-LINK Retaining Wall Systems have been used at many Brisbane landmarks such as Southbank Parklands, Iona College and Nut Tree Grove.

**Unique Sloping Face**

Because EASY-LINK is the only Dry Stack Retaining Wall System to have a SLOPING FACE, you can now have a retaining wall with a flush face, from ground level up without the step backs. EASY-LINK conforms to all Building Codes and Standards so you can rest assured you're using a Safe and Secure product.

EASY-LINK Retaining Walls have been specifically designed to look like Natural Sandstone not concrete. EASY-LINK blocks are not painted, they have a specially formulated die impregnated into them during the manufacturing process. This way their colour looks natural, lasts longer and never needs painting.

**Maintenance Free**

EASY-LINK blocks are made from high strength concrete with a sculptured rock face to look like natural sandstone. They have a very low absorption rate, so will not swell with moisture thus providing you with a very long lasting and environmentally safe retaining wall that looks great all year round.

- Will Not Rot or Burn
- Will Not Rust or Crumble
- Is Termite (white ant) Proof
- No Chemicals to Leach into Soil
